

# ***CMI Composite Gun Case***

The CMI Custom gun case represents the pinnacle of design, quality, and durability. 40 years of combined Composites and Product Design expertise result in the finest quality and most beautiful protection available for your prized firearm.

The all-composite construction of the CMI shell is designed to provide vault-like protection for your gun. The rounded edges and styling features of the composite shell provide outstanding structural integrity to the case, while presenting an elegant exterior appearance.

Breathtaking custom finishes are available, including:

- Carbon Fiber Laminate – This is absolutely the “Top of the Line”. Attempts are often made to imitate the beauty and depth of authentic Carbon Fiber, but the CMI Carbon Laminate is the most spectacular finish available at any price, and must truly be seen to be believed.
- Bonded Graphic - A proprietary process allows almost any graphic to be chemically fused to the contours of the composite case. Readily available options include Camouflage (contact CMI for current commercially available patterns), Snakeskin, Diamond plate, etc. A multitude of standard finishes are available, and custom designs, finishes, logos or artwork can also be accommodated.

- Beautifully tailored interior, custom-designed for any application
- Integrated full-perimeter o-ring to help ensure a watertight seal
- Recessed locks, latches, and handles
- Integrated Hinges / Rests

Please contact your CMI Representative for more information regarding this outstanding case.
